FENCE REGULATIONS

1. A Building Permit/Zoning Permit is required before the installation of any fence.
2. A plot plan or survey showing the location of the fence must be submitted with the Building Permit Application.
3. Any fence with poles must be constructed so as to have such poles face the property of the property owner on whose lot such fence is located.
4. Both sides of every fence must be painted the same color.
5. No fence may be constructed more than eight (8) feet in height within a side yard or rear yard.
6. No fence may be constructed more than six (6) feet in height within a front yard.
7. No barbwire or razor ribbon will be permitted in any residential districts.
8. Electric fences are permitted only in accordance with the following;
 - a) The fence may not be constructed in any front yard, side yard or rear yard applicable to a principal building
 - b) The fence must not cause any risk of shock, fire, injury or other hazard to person or property, and must specifically contain a pulsed current (as opposed to a steady current), and meet applicable Underwriters Laboratories standards.
